

GeFanuc Solution Provider

we can iFix IT...

Alba Controls has successfully implemented a wide range of GE Fanuc-based solutions. Our knowledge of this leading software stable is world-class, second to none and backed up by years of accreditation as Solution Providers and Batch Solution Specialists. If you are looking for a turnkey project, consultancy skills, training or troubleshooting, Alba's extensive knowledge and experience of implementing effective manufacturing control and monitoring solutions will help you to get the maximum benefit for your business.

GeFanuc

GE Fanuc, with newly integrated Intellution,  is a leading provider of industrial automation solutions, designed to help companies across all industries to optimize their manufacturing processes and improve the performance of their business.

Using award-winning technology, Intellution has provided an industry-standard software platform that collects, distributes, controls and visually presents information from the plant floor throughout the enterprise, supplying customers with scalable solutions that deliver increased productivity and return on investment.

Proven Capabilities

Alba's track record of success speaks for itself. We have built and commissioned complex, demanding iFix applications worldwide, based on solid design principles. We make sure you get the maximum return on your investment that is the right fit for your business.

Solution Provider

Our levels of expertise are underlined by our accredited status as systems integrators. We know when to use the clever stuff and how to design a practical solution, one that's easy to use and support. We have been doing 'IT' far longer than iFix has been around!

Batch Solution Provider

We know the  iBatch/Proficy batch software inside out. Our depth of knowledge and experience has been leveraged by GeFanuc to provide consultancy and training. We actively contribute to new version testing and even marketing collaboration.

Contact us and we will show you some demanding, world-class green-field and retrofit batch applications that really perform.

Proficy™ HMI/SCADA - iFIX

Capabilities

Highly Integrated

Our solutions offer DCS levels of functionality out-the-box using tools, techniques, custom blocks and scripts. This means our customers get more application functionality for their integration dollar.

We have proven suites of S88 pre-defined blocks and matching pop-ups, which can be tailored and fully integrated with the market leading PLC vendors.

Whether your project is for a standalone HMI or a highly integrated plant, batch or continuous, fast track or tightly validated, Alba has the ability to deliver a powerful, flexible, system that meets your needs.

Solutions regularly involve 'Business systems' which we interface to and provide reports from a range of SQL databases providers.

Our expertise

Our experience also extends to hot-standby configurations, terminal services and custom database dynamo development. This comprehensive knowledge also means we can help you to determine your hardware, software and licensing requirements, and when retrofitting existing plants, we can advise on the best route to take when choosing from the myriad of upgrade paths, helping you to breathe new life into the plant, while keeping capital expenditure down.

Consultancy... the right advice

Need requirements assessed and defined, functional specifications created, we do it. We are called upon to define and create corporate standards ensuring quality and consistency can be applied even over in-house and external developers.

Training

Train and be trained, make a point of it. Sounds great, but how do you get tailored, effective training that fits in with your needs and budget?

Our people can share their knowledge and provide on-site custom training that makes a real difference.

The Right Choice

Of course, by choosing Alba you don't just get a systems integrator with expertise. Alba has been implementing premiere automation and Industrial IT systems for nearly a decade. Our knowledge of IT systems, networking, plant information systems and more allows us to provide a complete service to our customers. This allows us to integrate a solution that is as customised and as flexible as you want it to be, all backed up by after-sales support including remote troubleshooting.

All these benefits and more make Alba the systems integrator of choice when it comes to implementing your GeFanuc software systems.
